1. INTRODUCTION

The Council established from the financial documents of the Commission for State Aid Control that the Republic of Serbia allocated two billion and 534 million euros for state aid over a period of three years. As this is a matter of allocation of large funds for aid, the Council planned to prepare a report for the year 2018 on state aid granted over the last three years, for which a report was submitted to the Government of the Republic of Serbia, and it will continuously monitor the granting of state aid in future, in order to prevent it from being a source of large systemic corruption.

The Council intended to determine the total amount of aid granted in the period from 2014 to 2017; if the aid was always given for the purpose of achieving a certain state interest; if the aid was used for the given purpose; if the given aid rendered expected results and to get, by cross-referencing all these data, the answer to the question if the aid is a purposeful way of spending public and significant state funds, and to point out to the Government to possible defaults in the allocation and control of the use of state funds that must be eliminated in order to prevent systemic corruption.

The procedure for granting state aid is non-transparent, as the data from the Report submitted to the Government of the Republic of Serbia, the European Commission and published on its website are presented in a total amount and the public cannot know which entities, in what amounts and on what basis are beneficiaries of the state aid. The Council requested this information from the Commission, but it was not provided and Council made a complaint to the Commissioner.

At a meeting held in the Council's office, a representative of the Commission stated that the Commission had all the information requested by the Council, which is in line with the Law on State Aid Control, but that it would not and could not submit it to the Council, as they did not have the approval of the "bosses" for delivery of such documentation.

However, in spite of the fact that the Council did not have all the requested documentation, it decided to write this Report on the basis of the obtained documentation and to indicate the need that this area should be regulated in order to prevent corruption and distortion of competition on the market due to a more favourable position created by granting state aid to some entities.

2. LEGAL FRAMEWORK FOR ALLOCATION AND CONTROL OF STATE AID

a. The allocation of state aid is not regulated by a law as it has been done with the control of state aid, but it is regulated by the Regulation on the Rules for Allocation of State Aid (Official Herald of the Republic of Serbia No. 13/10, 100/11, 91/12, 37/13, 97/13 and 119/14).

A regulation is a government by-law, which is passed by a government due to the generality and insufficient definition of the legal provisions, and hence a regulation is a derived act from a law, which can be adopted by a government and it is not an independent act. A regulation only elaborates, interprets and supplements the technique of the application of the provisions of a law, which means that a regulation cannot regulate rules, rights and obligations that do not arise from a law, which is why regulations do not replace laws, and they cannot be independent acts and have the force of a law.

Since the introduction of the multi-party system in Serbia, all governments resorted to the adoption of regulations that regulated rules, rights and obligations because in this way they avoided

the democratic principles of law-making, which always includes a broad, public and expert debate on draft laws, a parliamentary procedure and transparency.

The Regulation on the Rules for Allocation of State Aid, which was adopted in 2010 and supplemented in 2011, 2012 and twice in 2013, regulates the rules for allocation of aid, certain types of assistance, but it does not regulate competences, a transparent procedure, conditions, standards and criteria for granting aid, responsibilities and sanctions for the results and purposefulness of granting state funds.

Consequently, the Government has not legally regulated all aspects that must be regulated in order to make the granting of state aid transparent and accessible to persons who meet clearly specified conditions for obtaining aid, or to prevent corruption in granting state aid at personal discretion and establish the protection of free competition on the market without making privileged those who receive state aid.

b. The control of state aid in the Republic of Serbia was established by passing the Law on State Aid Control (Official Herald of RS No. 51/09). As no law on the allocation of state aid has been passed, this Law includes provisions specifying what allowed state aid is, and that the goal of such aid is to help social cases individually; to cover damages caused by natural disasters and emergency situations; to improve the economic development of areas with extremely low living standards and a high level of unemployment; to eliminate a serious economic disorder; to implement projects of special importance; to advance the development of economic activities or areas and to promote the protection and preservation of cultural heritage (Articles 4 and 5 of the Law).

Therefore, the interest of the state is to help all the listed cases and activities, and no one can be against it, on the contrary, the purpose of aid clearly shows that this is the case of humanity of the society and its desire that funds granted as state aid do not help only the beneficiaries but also improve the lives of all citizens.

v. State aid instruments are common and they include the following:

- subsidies;
- interest subsidies;
- approved loans under more favourable terms;
- tax incentives (tax reliefs, tax loans, tax write-offs, tax exemption, etc.);
- reduction of contributions for mandatory social insurance;
- capital investments (investments in risk capital);
- debt write-off;
- guarantees;
- short-term insurance of export loans;
- sale of immovable public property at lower prices.

g. Pursuant to Article 6 of the Law on State Aid Control and Article 43, Paragraph 1, of the Law on Government (Official Herald of the Republic of Serbia No. 55/05; 71/05, correction 101/07; 65/08; 1 6/11, 68/12 - CC Decision 72/12; 7/14 - CC Decision and 44/14) of 29.12.2009, the Government passed the Decision on the Establishment of the Commission for State Aid Control (Official Herald of the Republic of Serbia No. 112/09).

Members of the Commission are elected by the Government, and the Commission's competence is to assess whether state aid has been declared or granted in accordance with the Law on State Aid Control. The provider of state aid that submits the declaration is responsible for the

accuracy, completeness, credibility and truthfulness of the data on the basis of which the Commission makes a decision on the permissibility of the declared or approved state aid. The state aid provider is under an obligation to supervise whether the state aid user spends the funds in the foreseen amount and for the purpose for which they have been allocated. The Commission is responsible to determine if state aid is given in accordance with the Rules for Allocation of State Aid in order to protect free competition on the market.

The Law provides for the obligation that the state aid provider declares aid to the Commission, but the Law does not provide for sanctions in the event when aid is granted while the decision-making process is still ongoing or that the aid is not declared at all. In such cases, the Commission has the only possibility to report the observed irregularities to the Ministry of Finance – the Budget Inspection and to the State Audit Institution.

On this occasion, the Council addressed the Commission with a request for information if, in the 2014 – 2017 period, the Commission addressed the Budget Inspection and the State Audit Institution and for which specific cases. The Commission replied to the Council by a letter under No. 401-00-00033/2018-01, dated 06.03.2018, that, in the aforementioned period, it did not address the aforementioned institutions, which leads to the conclusion that there were no irregularities in the declaration or granting of state aid by state aid providers. The Chairman of the Commission is a representative of the Ministry of Finance, who carries out expert, administrative and technical tasks for the Commission, and the Deputy Chairman is a representative of the Commission for the Protection of Competition. Other members of the Commission are representatives of the Ministry of Infrastructure, the Ministry of Economy and the Ministry of Environmental Protection. The composition of the Commission corresponds to the purpose of the control of state aid, and the Commission formed like this is a body capable of making the preliminary control of the permissibility of state aid declared by an aid provider, making subsequent control of a granted state aid, making decisions and conclusions on the previous and subsequent controls, and annually submitting to the Government a report on the granted aid, (Articles 9 and 10 of the Law).

The state aid control is not carried out only by the Commission, in the part of the aforementioned competences, but also by the State Audit Institution (SAI), as the state institution responsible for auditing the spending of state funds, and the state aid providers, as well as the bodies responsible for the work of the Budget Inspection and the Autonomous Province Service, and the local self-government units performing the budget inspection tasks (Article 19 of the Law).

The Council has neither received a report from any of the above-mentioned state institutions, nor has it seen on the website of these authorities any reports that any controls of the state aid spending were made in any year, from which the Council has concluded that no controls have been conducted, which the SAI confirmed to the Council.

Accordingly, when considering the provisions of the Law on State Aid Control, which must be applied by aid providers and the Commission, the Government and the aforementioned state institutions, it is clear that the Commission has all the information requested by the Council in order to find out if all of the granted funds were under the control of the Commission, where and to whom the state aid funds were granted and if the results for which state aid was granted were achieved.

Without clear legal provisions on the conditions for granting aid, granting aid boils down to the decisions of a very small circle of persons who, without any control, can independently make decisions and use significant funds, which can be the basis for incredibly large systemic corruption.

The Council considers that whenever state authorities disable access to documents relating to the disposal of public funds, this means that something is hidden. The Council does not deliberate on who hides and why they hide information: if they hide the laziness or unlawful actions of state

authorities, if they hide someone's corruption or if it is a real or potential state public expenditure by which the beneficiary of the state aid has acquired unjustified privileges that have resulted in disruption of competition on the market, contrary to international agreements, or if it is a case of unlawful enrichment of people close to the authorities, but considers that the public should know the benefit the citizens have from the allocation of so high funds for state aid, the more so because the Budget Law does not regulate state aid so that it can be seen what funds are foreseen for state aid and the purpose of this aid, which leaves room for the disposal of funds without any control, responsibility and sanctions.

3. *FACTS ESTABLISHED ON THE BASIS OF THE DOCUMENTATION RECEIVED FROM COMPETENT INSTITUTIONS OR DOWNLOADED FROM THEIR SITES*

In its Report the Council has analysed a case of state aid to show if state aid funds granted through the Ministry of Finance, the Ministry of Economy, the Development Fund, the Ministry of Culture, the Ministry of Environmental Protection, the Ministry of Mining and Energy, the National Employment Service, are declared and spent purposefully and who supervises their spending.

On this occasion, the Council requested from mentioned institutions the data on state aid granted under the allocation instruments by the names of the entities that were granted state aid for the 2014 - 2017 period. The Council requested information on the granted state aid from the Insurance and Financing of Exports Agency (AOFI), but had received none, as according to their explanation that no state aid had been granted through the AOFI.¹

The Council requested information on all state aid providers primarily from the Ministry of Finance, since it is the obligation of this Ministry to forward, through the Commission for State Aid Control, the data collected from all state aid providers in the form of reports to the Government of the Republic of Serbia. However, the Ministry did not provide information to the Council, which is why the Council complained to the Commissioner for Information of Public Importance and Protection of Personal Data.

Because of the lack of regulations, unclear provisions of the Law on State Aid Control, the incorporation of material provisions in the Regulations, the Rules and the Rules of Procedure of the Commission, and provisions that must be regulated by a law, the Council has had major problems in finding out the facts about the granting and control of state aid. Another problem has been the lack of documentation, incomplete documentation, documentation not provided by the competent state authorities to the Council, as well as the lack of data on the control of the spending of state aid funds by the State Audit Institution and the Budget Inspection Department.

Comparing the data obtained from these institutions and the data submitted by the State Aid Control Commission to the Government of the Republic of Serbia for the 2014 - 2016 period (shown in Table 2 of the Commission and only available to the Council), a number of discrepancies in the amount of total state aid granted were observed, which should not exist. Specifically, due to incomplete documentation, the Council noticed discrepancies only with two ministries. The data from the Ministry of Environmental Protection differ from the Commission's data by about 17.3 million euros, and the data of the Ministry of Culture differ from the Commission data by 26 million euros.

¹ AOFI reply No. 1140/18, dated 19.02.2018, received by the Council on 22.02.2018 under No. 7207-1649/2018

On this occasion, and with regard to other data that the Commission did not submit to the Council, the Council addressed the Commission for an explanation, but regrettably received no response, and because of that the Council appealed to the Commissioner.

If the Commission does not have the exact data of the total granted aid, then it is not clear if anyone in the country has information on how much public funds have been granted as state aid.

The Commission is the state body where records of all granted aid had to be kept, as the Commission conducted the preliminary control procedure for granting aid, and without the Commission's decision on the allocation of state aid funds, no funds could be transferred to the beneficiaries. The Council considers that, in order to ensure any control of state aid, the total amount of aid must be determined, and the Commission must have it, as all state aid providers, including the Republic, the autonomous province, the local self-government bodies, as well as all legal entities that manage and dispose of public funds, must declare the granting of state aid. Upon the declaration of the aid, the Commission decides in the preliminary procedure by making a conclusion and a decision on the permissibility of granting the aid. This decision is delivered to the providers, and the providers deliver it to the aid beneficiaries.

If the Commission had done its job and had properly conducted the preliminary procedure, then the Commission must have accurate data on the total amount of granted aid, as it had to record the declarations and decisions made in the preliminary procedure. Considering the fact that the Commission submits an annual report to the Government of the Republic of Serbia on the granted state aid, it is in position to compare the given state aid with the decisions it has issued.

The Council does not know why there is a discrepancy in the amount of approximately 50 million euros in the Commission's records (less aid shown) only with two ministries, as we do not have complete data for others, but we consider that this is very important as the data discrepancy may indicate to the fact that the Commission did not control any aid granted, or that some amounts of aid were hidden from the publicity and control, and that the disposal of such funds could have a corruptive nature.

TOTAL GRANTED STATE AID IN THE REPUBLIC OF SERBIA IN 2014, 2015 AND 2016										
DATA OF THE COMMISSION FOR STATE AID CONTROL										
Item No.	Category	2014			2015			2016

6	Culture and information	12.133	103,4	11,4	10.123	83,9	9,7	11.909	96,7	12,0
7	Reovery and restructuring	10.505	89,6	9,9	23.566	195,2	22,6	12.123	99,0	13,2
8	Other (business entities in process of privatization)	3.538	30,2	3,3	561,6	4,7	0,5	845	7,0	0,9
II	Sectoral state aid	25.137	214,3	23,7	13.744	113,8	13,2	11.914	97,0	12,8
1	Mining	4.576	39,0	4,3	4.470	37,0	4,3	5.970	48,5	6,4
2	Transportation	12.716	108,4	12,0	9.274	76,8	8,9	5.944	48,3	6,4
3	Steel	7.845	66,9	7,4	0,0	0,0	0,0	0,0	0,0	0,0
III	Regional state aid	18.237	155,5	17,2	31.210	258,5	29,9	26.848	218,0	29,1
TOTAL		106.074	904,0	100,0	104.202	863,1	100,0	92.399	767,0	100,0

According to the above Table, the total approved state aid funds for the three observed years amounted to about 2.5 billion euros, out of which 1.9 billion euros account for industry and services, while 668 million euros account for agriculture. The state aid granted by the Ministry of Agriculture is shown only in the total amount, as the provisions of the Law on State Aid Control do not apply to agricultural products and fishery products (Article 1, Paragraph 2, of the Law).

Having analysed the data in the above Table and the observed differences with the mentioned ministries, we cannot take the figures presented in the Table as accurate, since the Council has examined only the reports of individual providers that it has received, which do not include the reports of all individual state aid providers.

The classification itself in the Table in the opinion of the Council is not good, because culture and information services are classified in the category of industry and services. According to the data from Table 2, 284 million euros were allocated for culture and information in the period of three years, which the Council analysed more closely in the part related to the Ministry of Culture as an individual state aid provider.

In addition to culture and information services, the state aid category for industry and services includes: research and development, training, employment, small and medium-sized businesses, environment protection, rehabilitation and restructuring, economic entities in the privatization process (in the table shown as "Other"), mining, traffic and transportation, steel and regional state aid.

As it can be seen from Table 2, there was no state aid for research and development, as well as for training in the three years' period, while state aid for small and medium-sized businesses was insignificant, specifically only in 2015, about 500 thousand euros.

According to the Commission's data, state aid for employment amounted to 8.4 billion dinars or 69.5 million euros in the 2014-2016 period. The Council requested the Commission to provide information on which were all state aid providers other than the National Employment Service (NES), bearing in mind that, according to the Commission's data, the allocation for this purpose was far greater than the amount shown by the NES.

According to the Commission's data, state aid for environment protection amounted to 3.6 billion dinars, or 29.7 million euros, and it significantly differs from the data provided to the Council by the Ministry of Environmental Protection.

The Council has not received an answer from the Commission which entities were granted state aid for the purpose of rehabilitation and restructuring in an amount of 46.3 billion dinars or 383.8 million euros in the 2014-2016 period. Besides, the Commission did not respond to the Council's request for information on which were the providers and beneficiaries of state aid in the 2014-2016 period for the categories "Other" in an amount of 4.9 billion dinars or 41.9 million euros; the categories of mining, transport and steel, in a total amount of 50.8 billion dinars or 425.1 million euros; as well as for regional state aid, in an amount of 76.3 billion dinars or 632 million euros.

According to the Commission for State Aid Control, in the mentioned period state aid was granted through the following instruments: subsidies, tax incentives (tax loans, tax debt relief, tax write-off), loans - favourable loans.

According to the data from Table 10, the largest amount of state aid was granted through subsidies and tax incentives. An amount of approximate 1.6 billion euros of state aid in form of subsidies has been approved over the three years; tax incentives amounted to half a billion euros, loans and guarantees 183 million euros, and the "rest" 212 million euros.

Total granted state aid in the Republic of Serbia in 2014, 2015 and 2016 by allocation instruments (including the Agricultural sector)

Table 10
Amount in million dinars

Allocation instrument	2014	In	2015	In	2016	In	Indices	
		%		%		%	16/14	16/15
Subsidies	85.766	80,9	53.133	51	56.058	60,6	65,4	106
Tax incentives	10.666	10,1	24.690	23,7	24.879	26,9	233	101
Favourable loans	3.654	3,4	2.543	2,4	462	0,5	12	18
Guarantees	5.981	5,6	8.924	8,6	275	0,3	5	3
Other	7	0	14.912	14,3	10.725	11,7		72
Total	106.074	100	104.202	100	92.399	100	315	300

For the sake of full transparency regarding who the beneficiaries of state aid are, which is not stated in the Report of the Commission for State Aid Control, the Council has shown the data on the state aid providers: the Ministry of Finance, the Ministry of Economy, the Development Fund, the Ministry of Culture, the Ministry of Environmental Protection, the Ministry of Mining and Energy, the National Employment Service, by each institution separately. Besides the above-mentioned providers, the Council does not have information if there were other providers and in what the aid amount was, as it has not received such data from the Ministry of Finance and the Commission for State Aid Control.

Besides the fact that the information on the total amount of state aid granted is not reliable, which, according to the Commission's data, amounted to about EUR 2.5 billion in the three years, there is no information that these funds were purposefully and effectively spent and how these

funds satisfied the general social interests or interests of the individual economic entities, because the purposefulness of the spending of the state aid was not controlled by the providers, the State Audit Institution, or other bodies foreseen to control the granting of state aid.

If the state aid primarily satisfies only the interests of the beneficiaries themselves, if this aid is not controlled and if the given aid does not contribute to the benefit for all citizens, then the general interest is jeopardized, and the possibility of abuse and corruption is very certain.

4. REPORTS OF INDIVIDUAL STATE AID PROVIDERS

4.1. MINISTRY OF FINANCE

As early as February 13, 2018, the Council addressed the Ministry of Finance to provide the names of entities to which state aid was granted and the amount of aid for each entity by the instruments of the aid granted over the 2014-2017 period.

At the request of the Council, the Ministry of Finance provided² the data compiled on the basis of the decisions of the Commission for State Aid Control on the approved state aid, which are otherwise available on the Commission's website (<http://www.kkdp.gov.rs/lat/>), but not the delivery of the state aid individually per years, as requested by the Council.

STATE AID ACCORING TO THE DATA OF THE MINISTRY OF FINANCE
Table of granted individual state aid in the 2014-2017 period

Decision No. of the Commission for State Aid Control	Date	State aid beneficiary	State aid provider	State aid amount in EUR	State aid amount in RSD	State aid instrument

In its reply to the Council, the Ministry stated that state aid providers should keep records on state aid granted, as well as on all data on state aid users, and that the Council should address individual state aid providers.

The very wording of the Ministry that state aid providers “should” have the information tells how the Ministry of Finance and the Commission for State Aid Control take the spending of public funds. If the Ministry of Finance has only a database relating to the issued decisions of the Commission for State Aid Control, but not a database of actual implementation of these decisions, the question is raised who controls the payment of the allocated funds and compares them with the issued decisions, or these funds are but a permanent gift, without any obligation of the aid beneficiaries towards the issued decisions or the State.

Article 3 of the Rulebook on the Methodology of Drafting Reports on Granted State Aid stipulates that a state aid provider is obliged to submit the prescribed data for the preparation of an annual report, i.e. the data on the granted state aid to the ministry responsible for finance in the form of the prescribed State Aid Table. The State Aid Table contains the data on providers and beneficiaries of state aid, the beneficiary's business sector, number of Commission's decision, type of the state aid measure, legal basis for granting state aid, type, amount, state aid granting instrument, source of funding, duration and purpose of the state aid.

In compliance with the above article of the Rules, the Ministry of Finance must have in its database the amounts of paid state aid on an annual basis by each provider and beneficiary, and by the aid granting instruments.

From the documentation submitted by the Ministry of Finance to the Council, which is an integral part of the Council's Report, it can be seen what are the decisions of the Commission for Individual State Aid and what are the decisions for the state aid scheme for the 2014-2017 period, but it is not possible to check what amounts were paid according to the issued decisions on the annual basis.

The Ministry of Finance and the Commission for State Aid Control do not make cross-reference checking of the payment of state aid with the issued decisions on approved and declared aid on the annual level, which is necessary because in this way it would be possible to obtain information if the implementation agrees or disagrees with the issued decision, as it may lead to the possibility of corruption and abuse.

The Commission's decisions submitted to the Council by the Ministry of Finance are not an answer to the Council's request, which requires information on the implementation of state aid by each beneficiary, both by aid value and by aid granting instrument. If the Ministry has responded to the Council that it does not have such information, it is not clear on what basis the annual report on the granted state aid is compiled and forwarded through the Commission to the Government of the Republic of Serbia.

Besides the fact that the Ministry of Finance did not deliver to the Council the consolidated data for all state aid providers, but referred the Council to address individually to each provider, the Ministry has not provided the data under its jurisdiction, relating to the granted tax incentives to aid beneficiaries, which, according to the given table, contributes to a very large reduction of tax revenues of the state, without information on how much this is reflected on the general social interest, and how much on the interest of the very business entities being the incentive beneficiaries.

4.2. MINISTRY OF ECONOMY

At the request of the Council, the Ministry of Economy submitted the data on the allocated state aid for the 2014-2017 period, in form of a table (Table 1 and Table 2)³

a) Table 1

LIST OF INVESTORS WHO RECEIVED STATE AID FOR THE 2014-2017 PERIOD

According to the data from Table 1, in the 2014-2017 period state aid was given through the Ministry of Economy in a total amount of 239.5 million euros to stimulate investments in the

Republic of Serbia. Out of the 57 investors that received incentive funds in the mentioned period, only seven were from the Republic of Serbia.

According to the latest data registered with the Business Registers Agency (APR) of the Republic of Serbia (2016, 2017), 21 entities have made an operating net loss. Out of the 57 investors, ten investors are engaged in the production of electrical, electronic and other equipment for motor vehicles, for which they received incentive funds in an amount of 68.4 million euros and, according to the latest APR data, the number of their employees is 5121 and six investors operate with a total loss of more than 10 million euros.

Besides, interesting information from the above Table is also the allocation of funds for food production, food processing and trading, where more than 10 million euros have been allocated for three investors, and the number of their employees is 122 persons. For some of them, such as CG FOODS EUROPE Nova Pazova, whose majority owner is from the UAE, the funds were approved in 2015 in an amount of almost 4 million euros, and the number of its employees is four persons and the company made a loss of 19.6 million dinars. In 2014 subsidies of 3 million euros were also given to TRUCK LITE EUROPE Belgrade, whose founder is from Germany, for the production of lighting equipment and, according to the latest APR report, this investor does not have any employees yet. In 2017 subsidies of 8 million euros were also given to an investor from Austria, i.e. to his company ZG Lighting SRB d.o.o. Belgrade, for production of lighting equipment, but the APR does not have any data on the number of its employees or its financial results. There are no data on the investors from Italy who have received incentives for production of perfumes and footwear.

b) Besides the data related to incentive funds, granted primarily to foreign investors, *de minimis* state aid has been also granted through the Ministry of Economy, which can be seen from Table 2.

Table 2

Table of *de minimis* state aid

Year	<i>De minimis</i> state aid provided	<i>De minimis</i> state aid measure	Number of <i>de minimis</i> state aid users	Amount of granted <i>de minimis</i> state aid in RSD
2015	Republic of Serbia through Ministry of Economy and the Development Agency of Serbia	PROGRAM OF SUPPORT TO SMALL BUSINESSES FOR PURCHASE OF EQUIPMENT IN 2015	298	500.187.170,00
		TOTAL	298	500.187.170,00
2016	Republic of Serbia through Ministry of Economy and the Development Agency of Serbia	PROGRAM OF SUPPORT TO SMALL BUSINESSES FOR PURCHASE OF EQUIPMENT IN 2016	373	542.930.576,95
		Republic of Serbia through Ministry of Economy and the Development Fund of the Republic of Serbia	257	187.861.455,17
	TOTAL	630	730.792.032,12	
2017	Republic of Serbia through Ministry of Economy and the Development Fund of the Republic of Serbia	PROGRAM OF INCENTIVES FOR DEVELOPMENT OF ENTREPRENEURSHIP THROUGH FINANCIAL SUPPORT FOR BUSINESS START-UPS	318	231.060.779,41
		Republic of Serbia through Ministry of Economy and the Development Agency of Serbia	396	560.717.551,95
	Republic of Serbia through Ministry of Economy and the Development Fund of the Republic of Serbia	94	301.476.471,37	
	Republic of Serbia through Ministry of Economy and the Development Fund of the Republic of Serbia	123	298.273.645,37	
TOTAL	931	1.391.528.448,10		
TOTAL 2015+2016+2017			1859	2.622.507.650,23

According to the data from Table 2, state aid granted as a support program for 1067 small-sized companies for purchase of equipment in 2015, 2016 and 2017 amounted to 1.6 billion dinars, or about 13 million euros. The program of stimulating the development of entrepreneurship through the financial support for 575 business startup entities in 2016 and 2017 amounted to 419 million dinars, while about 600 million dinars or five million euros were allocated for 217 entities for the stimulation of entrepreneurship through investments and development projects in 2017. The total allocated funds granted to 1859 beneficiaries on the above mentioned bases in the three years amounted to 2.6 billion dinars or 21.7 million euros.

4.3. DEVELOPMENT FUND

According to the Development Fund's data on allocated favourable loans in the 2014-2016 period, shown on the Fund's⁴ website section "List of Approved/Rejected Loan Applications", the Council has compiled a table per users in the total amount. Although there are data for 2017, the subject of the analysis is 2014-2016 period because these data can be compared with the data of the Commission for State Aid Control, which has the data covering the period until the end of 2016. According to the Law on State Aid Control, state aid through the allocation of loans from the Development Fund refers to favourable interest on the loans of the Fund, as well as to certain subsidies, and not to the total amounts of the approved loans, which the borrowers have to repay to the Fund together with interest.

⁴ <https://fondzarazvoj.gov.rs>

Based on the data presented in the Table, favourable loans in the amount of about 25 billion dinars, or about 207 million euros were approved for 992 users in the 2014-2016 period. The Council does not have information on the amount of state aid in the form of favourable interest in relation to the stated amount of loans.

Besides the data on the approved loans, the Council requested from the Fund the data related to the control of earmarked loan spending, data on regular servicing of matured liabilities, as well as data on initiated procedures for non-purposeful use of loans and non-payment of matured liabilities.

To this request of the Council, the Fund⁵ sent a response in the form of a table showing that out of a total of 976 users in the 2014-2016 period, field control was conducted of only 54 users, the contract was terminated with 58 users, nine loans were paid, and 419 users were monitored.

The Fund also sent a response to the Council relating to initiated proceedings in the 2014-2017 period for 5504 loan beneficiaries, in accordance with the technical possibilities of the consolidation and presentation of the data related to cases in which procedures of enforced collection from the collateral have been initiated, out of which the Council has compiled the following table.

YEAR WHEN THE SUIT WAS FILED	PROCEEDING PHASE	NUMBER OF LOAN USERS	TOTAL VALUE OF DISPUTES	TOTAL CONTRACTED AMOUNT	NUMBER OF USERS WHO MADE PAYMENT ON 31.12.2017.	TOTAL AMOUNT OF PAYMENTS AS AT 31.12.2017.	TOTAL NUMBER OF USERS

In addition to the data presented in the Table, the Fund highlighted, in its reply to the Council under No. 02-1023, dated 15.05.2018, a number of problems accompanying the declaration and collection of disputed loans.

In the part of the collection of documents, the certification of the pledge statement as an enforcement document by a notary public poses an aggravating circumstance. Specifically, the Enforcement Law provides for the initiation of proceedings with the original enforcement document, or a certified copy thereof. In the earlier period, documents were certified by courts and municipalities and, according to the Fund, there were no delays at the time. After the change of the Law, the preparation of the documentation has been significantly slowed down as notaries public do not perform the certification of pledge statements in due time because of large workload, and consequently there is a delay in the initiation of enforced collection procedures.

Another major problem, according to the Fund, refers to the assessments in court enforcement proceedings. Initially, assessors appointed by courts assessed the value of the real-estate property being the subject of sale in court proceedings disproportionately less than it was assessed at the time of granting the loan. After an assessment in accordance with the Law, the initial price at the first auction sale is 70% of the assessed value, and if the first sale fails, then it is 50% of the assessed value of the real-estate property, so that the real-estate property is sold at very low prices, which can be partially seen from the mentioned Table. In 5504 legal proceedings initiated in the 2014-2017 period, the value of the disputes amounted to 17 billion dinars, the contracted value 13.9 billion dinars, and the total amount collected as at 31 December 2017 was 1.2 billion dinars. However, this information is not final, as the Fund has not provided all information on the dispute value, the contracted and collected values.

If we have in mind that some of the loans were contracted ten or more years ago and suits were filed with regard to them over the last four years, it is clear how efficient are the Fund and other institutions in charge of collecting matured liabilities of loan borrowers. The following Table shows per years, starting from 2003, how many loans were disputable and for which enforced collection was initiated in the previous four years.

According to the data from the Table, in the period of three years, state aid granted through the Ministry of Culture amounted to 31 billion dinars or 257.6 million euros for 5463 beneficiaries. The largest state aid in the observed period was received by JMU "Radio Television of Serbia" in an amount of 21.4 billion dinars or about 178 million euros, followed by JMU "Radio Television of Vojvodina" in an amount of 5.9 billion dinars or about 49 million euros.

The data from the Ministry of Culture and the Commission for State Aid Control for the 2014-2016 period related to the granted state aid for culture differ by around 26 million euros. The Council does not have information why the difference in the data of these institutions is measured in millions of euros.

4.5. MINISTRY OF ENVIRONMENTAL PROTECTION

The Ministry of Environmental Protection has submitted tables⁷ on state aid granted through the Ministry for the 2014-2017 period per beneficiaries, which the Council has fully used in its Report.

Overview of realized subsidies of allocated state aid in the Republic of Serbia in 2014

Ministry of Agriculture and Environmental Protection

Item No.	Beneficiary	State aid allocation instrument	Amount in RSD

		Total	2.863.704.965,71

It is evident from the above overview that six billion dinars or about 50 million euros were allocated in the observed 2014-2016 period.

According to the data of the Commission for State Aid Control, state aid for environmental protection amounted to 3.6 billion dinars or 29.7 million euros in the 2014-2016 period.

According to the data from the Commission for State Aid Control, there were no allocations for environmental protection in 2015 and the Table shows zero value while, according to the data of the Ministry, 2.1 billion dinars were allocated in that year. The Council has no information why there is a difference between the data of the Ministry and the Commission.

4.6. MINISTRY OF MINING AND ENERGY

At the request of the Council for the data on the operational state aid granted to producers of electricity from renewable sources, the Ministry of Mining and Energy responded by a letter⁸ in which the Council makes a reference to the EPS website Supply <http://www.eps-snabdevanje.rs/obnovljivi-izvori/Pages/izvestaji.aspx>, which the Council has fully included in its Report.

⁸ Reply of the Ministry of Mining and Energy No. 011-00-00022/2018-08, dated 30.03.2018, received by the Council on 10.04.2018 under No. 7207-3360/2018

EPS SNABDEVANJE - Public supplier

Report on collected and spent funds as incentive compensation of privileged electrical power producers in 2014

Invoiced amount of incentive compensation of privileged el. power producers for 2014 (RSD incl. VAT): 2.775.255.889,99
 Collected amount of incentive compensation of privileged el. power producers for 2014 (RSD incl. VAT): 2.176.068.287,78
 Incentive compensation amount paid to privileged power producers for 2014 (RSD incl. VAT): 2.730.300.970,18

Note: The table shows privileged producers who had acquired the PP status by 31.12. The shown total value paid to privileged producers refers to the entire period of 2016.

PPG Provisional privileged producer
PP Privileged producer
IP Independent producer
S Solar power plant
H Hydro power plant
BPP Biogas power plant
CG Combine gas power plant
CC Combined coal power plant
W Wind power plant

Considering the fact that the invoiced and paid value of electricity from renewable sources is shown in the tables for the 2014-2016 period, the Council asked the Ministry to explain what part of the values in the tables refer to the market value of energy and what is state aid.

The Ministry of Mining and Energy responded to the Council by letter number 011-00-00022/2018-08. dated 15.05.2018 that the legal framework regulating the incentive measures from 2009 to 2017 was changed several times, and that six regulations and one law were passed, and that the Ministry of Finance always gave a positive opinion for the adoption of these regulations and laws without any suggestions or remarks.

For the first time the Ministry of Finance, by its opinion of 02 March 2016 regarding the submitted proposals of the regulations of the Ministry of Mining and Energy, pointed out that the incentive measures included state aid elements, so that the opinion from the Commission for State Aid Control should be sought, although the legal framework regulating the area state aid did not change in the meantime.

The Commission passed the Decision No. 401-00-00113/1/2016-01, dated 01 September 2016, on the basis of the declaration of the Ministry of Mining and Energy, in accordance with the Regulation on Incentive Measures (Official Herald of RS No. 56/16), and according to this Decision the planned amount of state aid to privileged producers of electricity amounted to 12.3 billion dinars, i.e. 3.7 billion dinars in 2016; 4.1 billion dinars in 2017, and 4.5 billion dinars in 2018. The estimated amounts of state aid in the specified years are determined as the difference between the amount paid to the privileged producers for the produced electricity and the amount that the guaranteed supplier pays for the same amount of energy on the electricity market. End users, through their bills for delivered electricity, pay compensation whose amount is determined so to cover the difference between the “feed-in” tariff amount and the market price at which the guaranteed supplier purchases electricity. Otherwise, the “feed-in” tariff is an incentive purchase price per Kwh produced from renewable energy sources, in line with the technology that is being applied and which is prescribed by the RS Government for a certain period of time.

In the aforementioned response to the Council, the Ministry of Mining and Energy pointed out that it did not have the information requested by the Council as the development of the same was not necessary, although the information refers to the clarification of what part in the price of electricity paid to privileged producers refers to state aid. If the Ministry of Mining and Energy does not have information on the state aid granted to privileged electricity producers on an annual basis, the question is 'on the basis of what information the Commission for State Aid Control submits reports to the Government on state aid granted to producers of electricity from renewable sources.

4.7. NATIONAL EMPLOYMENT SERVICE (NES)

On 04.04.2018 the National Employment Service delivered electronically the data on the state aid it had granted on the basis of employment, the Council compiled the Table below for the 2014-2016 period. An amount of 2.4 billion dinars or about 20 million euros was allocated for state aid based on employment through the NES.

According to the Commission’s data from Table 2, state aid in an amount of 69.5 million euros was granted for employment in the period of three years. The Council did not receive from the Commission an explanation on who were providers of state aid based on employment, except for the National Employment Service, with regard to the fact that the difference between the total

amount of aid granted on this basis shown by the Commission and the aid provided for employment through the NES is 49 million euros.

NATIONAL EMPLOYMENT SERVICE

5. *CONCLUSION*

The Government has not passed the Law on Granting State Aid, which would regulate in detail who, how, in what procedure an aid provider and an aid beneficiary can be; the conditions, standards and criteria for granting state aid; the responsibility and sanctions for all participants in the allocation and use of state aid.

The Regulation on Granting State Aid is a by-law passed by the Government. This act neither has the force of a law, nor can it regulate general and individual norms in the material and legal sense. A regulation as a by-law is not an independent act, but an act derived from a law that must be in accordance with the law, and which elaborates the technique of the application of some articles of the law, and therefore a regulation can never replace a law. The Regulation on Granting State Aid does not contain the abovementioned rules, rights and obligations, which should be contained in the Law on Granting State Aid.

The Law on State Aid Control is incomplete because it does not fully regulate the granting of state aid, which is not possible either as there is no legal regulation for granting aid; it neither regulates the control of the implementation of the given aid, nor does it regulate the control of the purposefulness of the allocation of funds.

The records of the allocation, implementation and control of state aid are insufficient, inaccurate and incomplete and the following cannot be determined from them:

- what is the exact amount granted by the State as state aid in the period monitored by the Council;
- for what purposes the State granted state aid to individual providers and by what instruments;
- if the control of the implementation of the granted aid was properly conducted;
- if the state through the allocated funds achieved the public interest for which the funds were allocated;
- if any proceedings were conducted because of non-purposeful spending of granted aid.

All the data related to the granting of state aid are non-transparent because the tables, published by the Commission and taken over by the Council as part of its Report, do not show all the facts, starting from the fact which individual entities used state resources, for which purposes and in what amount and whether the public interest was achieved, or the purpose of spending the aid funds.

State aid control cannot be effective because, first of all, there is no law that regulates the rules, rights, obligations, responsibilities and sanctions for responsible persons, all in relation to state aid, since any control must and can only be done if there are clear rules on the actions of both aid providers and aid beneficiaries.

6. RECOMMENDATIONS

- 1) to pass a law on granting state aid;
- 2) to amend the Law on State Aid Control in the part of allocation, control, as well as the responsibility and sanctions for granting state aid;
- 3) that the Commission for the Protection of Competition should undertake the tasks of the Commission for State Aid Control;
- 4) that the State Audit Institution should perform annual control of the purposefulness of spending state aid and publishes the results of such control on its website, informing the Government and the Parliament of the Republic of Serbia;
- 5) to legally provide for the obligation to recover funds in case of their non-purposeful use;
- 6) to activate security instruments for all investors who failed to comply with the contractual obligations for which they received incentive funds;
- 7) that the allocation of incentive funds to investors should be made exclusively on the basis of their references and verified financial standing, and not at all costs;
- 8) to amend the regulations that slow down the initiation of enforced collection procedures of the Development Fund loans, as well as the regulations in the part of the assessment of the value of real-estate property when granting loans and enforced collection;
- 9) to prescribe special rules for granting state aid for environmental protection;
- 10) to amend the Energy Law according to the recommendation of the Energy Community in accordance with the EU guidelines on state aid for environmental protection and energy in the 2014-2020 period;
- 11) to publish data on beneficiaries of tax incentives on the website of the Tax Administration;
- 12) to regulate state aid in the field of culture and information by amending the laws;
- 13) to legally regulate the state aid control in the field of agriculture;
- 14) that state aid on the level of local self-government units should be transparent and published on the website of each local self-government unit;
- 15) to change the policy of granting state aid by investing in research and development and training, which, according to the data of the Commission has been missing so far;
- 16) to legally regulate the responsibility of and sanctions for all responsible persons in the bodies of public authorities who withhold information of public importance.

VICE PRESIDENT

Prof. Miroslav Milićević, PhD
